DESCRIPTION

Spending time in bed can be frustrating particularly if you wish to use a laptop, read or do an activity. This is where the Evocare Overbed Table can help; it allows a patient to place food and their necessities within easy reach - right over to them. You can keep active while recovering at home or hospital.

The Evocare Overbed Table is a sturdy portable table, accessible from the bed, with castors for smooth movement and simple height adjustment. Changes in height and position can be easily managed by the patient or carer. The height can be adjusted for use over a bed, couch or chair, and the castors can be locked so the table holds its position giving a stable work top.

An Evocare Overbed Table allows a previously active patient who is now confined to bed to undertake activities, to be productive and reduce their boredom. This can be of significant psychological benefit allowing activities to contribute to their confidence and rehabilitation.

An Evocare Overbed Table can supplement a bedside cabinet, giving more space for medicines and personal items such as photographs.
