

Combination Washer Disinfector Sanitizer (WDS)*

- Only combination utensil washer & bedpan sanitizer made in Australia
- Large capacity: 4 urinal bottles and 2 bedpan, or any combination of utensils (tooth mugs, sputum bowls, kidney dishes, basins, etc)
- Energy efficient: 20 Amp, single phase
- Infection Control: Microbiologically tested by an independent NATA certified laboratory
- Compliant to relevant electrical safety, Watermark and ISO & AS/NZ standards
- Simple operation: 3 standard cycles (urinal bottles only, bedpans and urinal bottles, utensils)
- Hot water and detergent for disinfection
- Steam sanitizing
- LCD display
- USB interface for uploading usage history, temperature and cycle validation

WDS

Malmet's latest product, the Washer Disinfector Sanitizer combines the energy efficiency of Malmet's sanitizers with the robustness and large capacity of its washer disinfector. Malmet's own design sensors inhibit the use of incorrect cycle selection due to human error. This product combines two units in one, which offers great space savings at your facility. Being locally made, the availability of spare parts and servicing of the units is a simple and quick process. Malmet WDS have been micro biologically tested to prove that the unit effectively inactivates organisms with a relative resistant nature, that are prevalent in the hospital environment.

Product Specifications

Dimensions:	1,700mm H x 605mm W x 625mm D (Min 200mm side clearance for servicing)
Voltage:	240V
Phase:	Single
Hertz:	50
