Quality ISO 9001

Storing small parts can be a big headache... unless you're using the Dexion Maxi Small Parts Storage system.

"Maxi" has been specifically designed for ultimate flexibility... every detail of the system displays the innovation and forethought of Dexion's fifty years as a leader in the industry.

Seven bin sizes, five colour codings. Louvred panels that leave the design of the system in the hands of the true expert in your business needs... you.

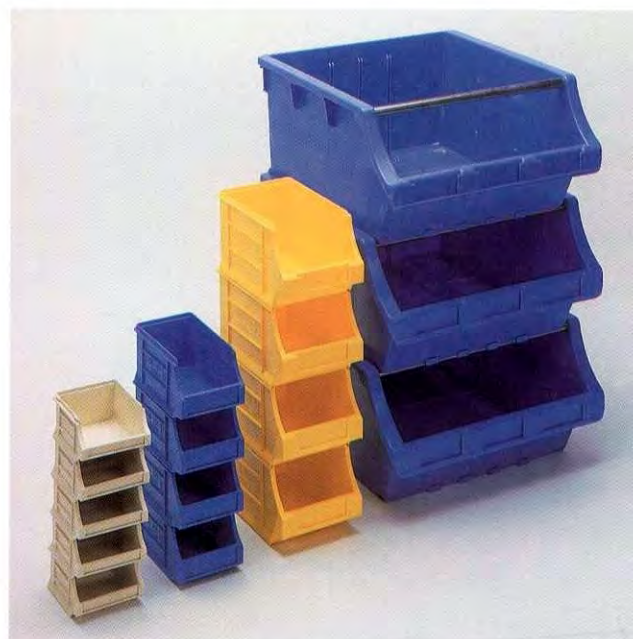

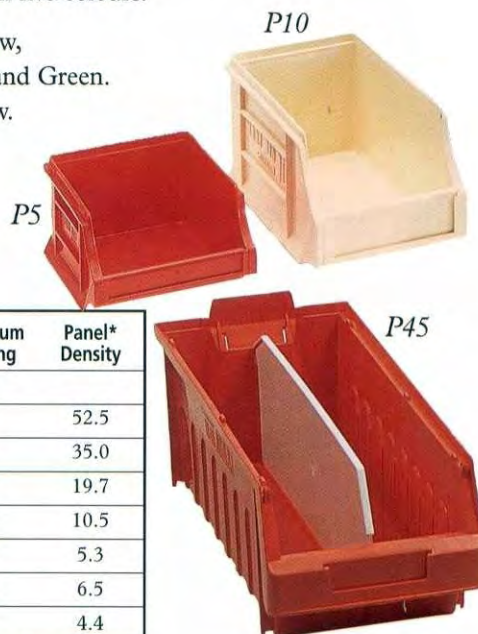

MAXI BINS

Made from polypropylene in seven sizes and in five colours.

Colours: (P5, P10, P20, P30) Red, Blue, Yellow, Green and Almond. (P40) Red, Blue, Yellow and Green. (P45) Red. (P60) Red, Blue, Green and Yellow.

Ref.	Width mm	Depth mm	Height mm	Dividers	Maximum Loading kg	Panel* Density
P5	100	120	60	N/C	2	52.5
P10	100	178	85	N/C	5	35.0
P20	135	225	125	N/C	9	19.7
P30	205	280	165	ONE	14	10.5
P40	410	280	165	TWO	18	5.3
P45	180	440	145	SEVEN	13	6.5
P60	410	457	216	THREE	27	4.4

* Panel density is the approximate number of bins that will fit into a linear metre of standard 457mm wide panel.

SELF STACKED BINS

The interlocking design of Maxi Bins ensures secure stacking and prevents the bin from splaying under load. The P5 bins slot together for easy carrying. The P30 and P40 have recessed handholds. The P60 has a removable zinc plated bar, which facilitates easy stacking of full bins.

NEED ADVICE

Let the Storage Centre professionals advise you on the design and installation of your storage or warehouse system.

All Storage Centres stock the full range of Dexion products to provide fast service to their customers.

P60

Bins that stack, bins that divide... covering the needs of retail right through to manufacturing and warehousing.

Tilt boxes, transparent lids, the "Maxi" list of features simply has to be seen to be appreciated.

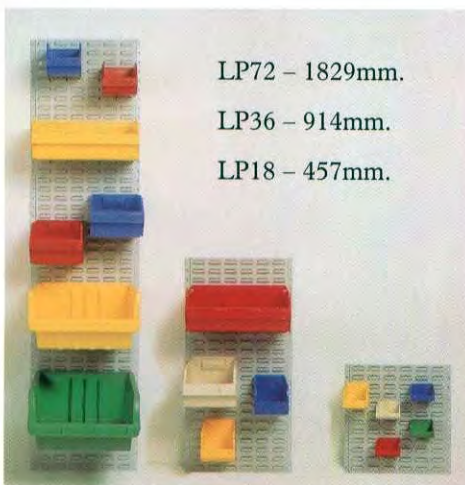

Accessories to suit every need from hooks, hangers and trolleys, to demountable panels, through to large scale binning systems.

And all Maxi parts are backed by Dexion's commitment to ongoing product development, to meet your storage needs now and into the future.

LOUVRED PANELS FORM THE BACKBONE OF THE MAXI SMALL PARTS STORAGE SYSTEM

The steel panels allow all sizes of Maxi Bins to hang in a high density configuration. Panels are finished in Grey.

All panels are 457mm wide and can support 68kg of stock for each 305mm height of panel. Single sided panels are available in three heights:

LP72 - 1829mm.

LP36 - 914mm.

LP18 - 457mm.

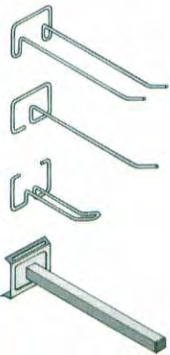

FREE STANDING RACKS

Double sided panels with rack feet (rack feet sold separately) - available in two heights - 1375mm and 1840mm.

PEG-BOARD HANGER

These chrome plated Maxi hangers provide the facility to hang P5 and P10 Maxi bins on peg-board.

Hooks available for the louvred panels to hang those awkward items.

BENCH UNIT

A small free standing louvred panel for bench top and workstation use. Size: 457mm square. Finish: Grey.
