

# Oxford Advance Patient Hoist

## Technical Information

**New!** The Advance Hoist can be supplied with either a Spread Bar or with a Pivot Frame attachment.

The Advance Hoist is a compact fold-away hoist yet it is able to perform a wide range of transfers. Whether from the floor, on to a nursing or domestic bed, or wheelchair to commode chair, the Advance copes with ease.

### Key Dimensions:

Min. Lift range	390mm
Max. Lift range	1690mm
Max. Leg clearance	115mm
Safe working load	155kg

### Folded compact dimensions:

Height 430mm, Length 1180mm, Width 550mm

The Advance Hoist's unique 'swan neck' leg design allows the hoist to get even closer to wide obstacles.

## Easy to Transport and Store

Unlike other products on the market the Advance Hoist needs **no** tools or special attachments to achieve its compact folded position. This functionality gives active users the option to travel outside the confines of their own home. Bringing a new dimension to mobile patient handling equipment.

In addition to outstanding performance, the Advance Hoist can also be folded, or separated for transportation.

The Advance Hoist is most useful where space and storage are at a premium. It is especially useful in home settings and nursing institutions where space is not always available.

A push foot-pad has been incorporated into the design to reduce the force needed to initiate movement when manoeuvring the stationary hoist in a forward direction. The over-sized handle provides a large surface area from which the carer can position the hoist before use.

The triangular folded design enables the hoist to stand upright and unaided when being stored or transported
