

Walking Sticks

Traditional styling, choice of handle type, robust construction, supplied with anti-slip rubber tips.

LM300 / G120

LM300 / G120 Traditionally styled Wooden Walking Stick in natural solid wood with Crook handle is fixed height (cut to suit users) Nominal length 900mm.

Still the most common, **Wooden Walking Sticks** have been around for years. Wooden crook handle sticks are durable and strong and lightweight.
REMEMBER: They must be cut to the specific height you require. You cannot change the height except to make it lower! For that reason we strongly advise customers to err on the side of cutting the stick to a longer length and then working down slowly.

LM3328L LM3834

Aluminium Sticks – Constructed of strong, lightweight aluminium, available with a variety of hand grips, supplied with anti-slip rubber tips.

LM3328L Black Finish Aluminium Waking Stick Adjustable Height with Rehabilitation T Handle for left-handed use –

Rehabilitation (ergonomic) "T" handles are molded to fit the hand and distribute body weight evenly over the handle and over the stick. 'anatomically-correct' handles can reduce pain in the wrist and hand from not holding the stick properly.

ARTG No: 200852
