All Electric Examination Couch

Acero examination couches offer a very cost effective solution to any consultation facility. The all electric operation not only provides ease of use, but is ergonomic and OH&S friendly.

A generous low height, allows for easy ingress by patients and the couch can be effortlessly raised to a comfortable height for the care giver.

Both the two and three section models are ideal for general examination, assessments and clinical treatment, yet the three section model is very helpful in the management of lower limb problems such as vascular circulation.

The couches are fitted with 100mm castors, fully braked that enables transportation where necessary. Twin support frame design enables excellent stability and weight distribution. Unique base design gives clear access for patient lifters and over bed tables

2 Section
