

Credo – the smart bedside cabinet

The Credo, too, with its height of 56 cm, is ideal for all **low-height beds**. In addition, the small bedside cabinet boasts a wealth of **practical details**.

The side panel conceals a bottle holder which can be attached on either side of the bedside cabinet. This provides a secure hold for bottles and means that they are close at hand and easy to reach. Glasses

and bottles can also be placed safely on the bedside table, as this is surrounded on three sides by the wooden bedside cabinet sides. Objects placed there are protected from falling off or being knocked over as a result. The two large drawers running on roller wheel slides round off the features combining **comfort with ample storage space**.
