

ESSENTIALLY BETTER

Quado

The compact miracle

Always in the right place

The mobile bedside cabinet Quado

The new bedside cabinet Quado by Stieglmeyer is a real compact miracle. With its functions reduced to the most important ones it is particularly suitable for daily hospital routines. At the same time 2 open compartments on both sides and a drawer that can be opened to both sides offer enough storage space for the personal belongings of the patient. With its neutral colours Quado adapts well to room furnishings and every hospital bed. If the overbed table is not needed, it can be lowered easily and damped.

▲ With its neutral colours Quado adapts well to room furnishings and every hospital bed.

◀ Thanks to gas spring assistance, the Quado can effortlessly be adjusted to the desired height of 85 to 115 cm.

▲ The Quado's overbed table can be lowered easily and damped.

▲ The extendable bookrest under the overbed table top offers the patient high reading comfort, without having to clear the table (optional).

Transport

Bed with bedside cabinet

Quado can be attached to the head or footboard for a joint transport with Stieglmeyer beds.

The easy transport of the Quado ensures relief during the daily routine. It can be attached to the head or footboard of almost all current Stieglmeyer hospital beds without effort, and thus can be transported together with the bed when a patient is relocated. The joint transport saves care staff from having to carry and, if applicable, document the personal items. During a simple transport the Quado can be rolled along with the bed. During a transport across thresholds or obstacles the cabinet should be lifted using the bed's

height adjustment. Once the Quado has arrived at its destination, it can be safely parked next to the bed thanks to its castors with brakes.

The Quado bedside cabinets can be pushed together for storage to save space.

Hygiene

Reliable reprocessing

The Quado is machine washable and can also be easily cleaned manually. This ensures optimum hygiene in the hospital.

▲ The chassis ensures high stability and straightforward cleaning.

The straight-line overbed table-top is particularly easy to clean.

▲ The hygiene-friendly design of the Quado lends itself to easy and thorough reprocessing.

Quado

The space-saving bedside cabinet for any hospital unit

Free space is often at a premium in patients' rooms. Yet it is urgently needed: for mobilising patients, administering treatment and creating a pleasant atmosphere, particularly in rooms containing several beds. Our slimline Quado bedside cabinet **saves valuable space** and still offers ample room for **storing personal belongings**. The lightweight Quado is also **effortless to push aside**

if it is in the way. When the bed is transferred to another room, the Quado is **simply hooked onto the headboard or footboard**. These advantages also recommend it for use in intensive care units, where patients have few belongings with them and are often transferred.

ESSENTIALLY BETTER

The Quado can be effortlessly adjusted to any desired height between 85 and 115 cm. This allows patients to easily access their personal belongings.

The large overbed table offers ample space for placing items and reaches far over the bed.

The pullout book support under the overbed table top provides patients with high reading comfort without having to clear the table (optional).

Ideal options for use

As well as for use in regular and intensive care units, the Quado is also ideal for day clinics and dialysis centres, where it perfectly complements our comfortable Mobilo stretcher, for example.

In **intensive care units**, the space-saving Quado comprises the ideal combination of server and bedside cabinet. With its easy height adjustment and fold-up bed table, meals can be taken comfortably in bed.

Women often spend only a short time in the **maternity unit** – so the slimline, space-saving Quado bedside cabinet is an ideal companion here. It is so easy to adjust that patients can set it to a convenient position themselves at any time without calling the nurse.

Patients in **day clinics** or **dialysis centres** require very little storage space. They can use the Quado as a practical dining table and storage unit while they are in bed or on the transport stretcher.

There is often little space in hospital rooms in the **children's unit** when parents stay overnight with them. The lightweight Quado can then simply be pushed to the side to make room. Smart accessories such as a USB extension cable with a clip to attach it to the cabinet rail offer additional comfort.

▲ The Quado can be transported together with Stiegmeyer beds by simply attaching it to the headboard or footboard.

Easy transport on the hospital bed

The easy way to transport the Quado helps to relieve the strain of everyday life. It can be effortlessly attached to the headboard or footboard of almost any current Stiegmeyer hospital beds and so can be transported together with the bed when a patient is transferred. This piggy-back transport saves the nurse not only from transferring the personal belongings but also from having to document these. Depending on the condition of the floor, the Quado can either be wheeled along or lifted off the floor by raising the height of the bed.

Patients are transferred within specialist departments in 11.1% of cases during their stay in hospital.

Spindler, Jutta (2018): Case-based hospital statistics: Diagnoses and procedures of hospital patients based on data according to §21 Hospital Fees Act, In: Krankenhausreport 2018, J. Klauber, M. Geraedts, J. Friedrich, J. Wasem (eds.), Schattauer, Stuttgart, p.427

◀ With the Quado attached, one nurse alone can transport the patient without further assistance. This saves personnel resources and relieves the strain on personnel.

Cost-effective use One model for many uses

▲ For the purpose of storage, the bedside cabinets can be pushed together like shopping trolleys, to save space.

With its flexible usage options, the Quado supports cost-effective working in all hospital units. As an easily steerable trolley for medicines or cleaning equipment, it can be wheeled quickly and effortlessly to any location. The large fold-up overbed table is a convenient writing surface for updating daily records or information.

If several Quados are stored for a while, such as prior to reprocessing, they can simply be pushed together to save space and take up less room.

ESSENTIALLY BETTER

Advantages at a glance

- Ideal for use as a ward trolley due to its excellent manoeuvrability and low weight
- Compartments and drawers that can be used from both sides offer practical storage space for medicines or cleaning materials
- Sliding several bedside cabinets inside each other saves space and facilitates transport

Additional application possibilities

▲ Trolley for cleaning equipment.

▲ Medicine trolley.

▲ The ward trolley can be used as a writing surface for documenting purposes.

Hygiene

Reliable reprocessing

When it comes to reliable hygiene in hospitals, bedside cabinets are seldom the focus of attention. Yet they are touched frequently by many people and exposed to contamination through being used to store drinks, food and care utensils. The Quado sets new standards in hygiene. It is **machine-washable as standard** and, whenever required, can be **effortlessly hooked onto a bed** and wheeled into the washing system together with the bed.

With its **large radiuses and easily accessible surfaces**, thorough manual reprocessing is also particularly easy with the Quado. Its drawer can be removed and cleaned in the dishwasher. This is how to achieve **validatable hygiene** in the fight against multi-resistant germs.

▲ The chassis ensures excellent stability and is easy to clean.

▲ The Quado can be wheeled into the reprocessing unit together with the bed, saving personnel resources and ensuring reliable hygiene.

▲ The flat overbed table top is particularly easy to clean.

▲ Easily accessible surfaces lend the Quado its excellent hygiene properties.

More comfort for patients

Useful accessories

▲ For greater security, an option of a lockable drawer for valuables is available.

▲ With the short or long hook, towels or toiletry bags can be stored close to the patient.

▲ A plug-in USB extension cable allows mobile devices to be charged within easy reach of the patient.

▶ The cup holder offers a secure hold for glasses and bottles.

◀ The optional additional compartment at the side is suitable for storing magazines and other personal belongings.

▶▶ The optional holder for phones and multimedia systems provides added comfort and modern medical care at the bedside.

Accessories

Useful additions

▲ With a towel hook on the rail of the bedside cabinet the towel is always at hand for the patient.

▲ With the longer hook toiletry bags can also be stowed close to the patient.

▲ An attachable USB extension cable allows charging of mobile devices in reaching distance of the patient.

▶ The drink holder offers secure hold for glasses and bottles.

◀ The optional additional compartment is suitable for magazines and further personal items.

▶ ▲ The optional sleeve for telephones and multimedia systems allows action in accordance with the patient's needs and the rooms' features.
